

Savings Made Simple

Save for your personal goals—from vacations to a new home.

Whether you are putting some money away for a small purchase or saving up for something big, our line-up of personal savings accounts will help you get there. Signing up for an account is easy, and depositing checks and moving money around is simple with our free online and mobile banking.

All First National Bank savings accounts reward you with interest. What is more, you can easily build your balance with Savings Made Simple. When you link your First National Bank savings account to a First National Bank checking account, you can choose to automatically round up every debit card transaction to the next dollar amount and have the balance automatically transferred to your savings.

HOW IT WORKS

1

ENROLL

Stop by any First National Bank location and tell them you would like to sign up for Savings Made Simple.

2

SHOP

Shop as you normally would using the First National Bank debit card tied to your checking account.

3

SAVE

Each time you make a purchase with your First National Bank debit card, the purchase price will be rounded up to the nearest dollar amount and the difference will automatically be transferred into your First National Bank savings account. All debit transactions processed on the account will be included in the Savings Made Simple transfer. Once the transactions are completed the “round up” amounts will be aggregated and one transfer will be processed per day. If the funds are not available when the transfer processes, the transfer will not be completed.
